Max Havelaar

BY
MULTATULI.

It is difficult to say whether Max Havelaar is more interesting as a novel or powerful as a political pamphlet. From either point of view it is of rare and first rate excellence. In its life-like actuality it constantly recalls Defoe, while in its tender and original humor it suggests Sterne in his best moods.—"Westminister Review," April, 1868,

* * * That is the whole story. A book which combines more humor, knowledge of character, high thought, deep pathos, and vigorous political intelligence than any we have read for a long time.—"Evening Star." Feb. 14, 1868.

The story is remarkably clever, a rollicking, eccentric, grotesque and satirical humor overflowing on every page. It is unlike any other book that we have read. * * * Some of the episodes, that of Sadijah, for instance, are manifest creations of an imaginative genius of no ordinary kind.—"British Quarterly Review," April, 1868.

It is a novel in form, but in reality a political pamphlet. The revelations contained in it startled the country, and have ever since formed the ground for comment in the Legislature. Although Max Havelaar may seem less attractive to many who read nothing but novels than the morbid and silly stories which are in demand at circulating libraries, yet by other and more judicious readers, it will be heartily welcomed.—"Daily News," Feb. 10, 1868.

A more stinging satire of the lower propensities of the Dutch could hardly be conceived than that embodied in the Amsterdam coffee broker, Batavus Drystubble, (who) stands out a one of the most remarkable embodiments of money grubbing Phariseeism which lit rature has yet produced,

Thackeray himself, could not have surpassed this scathing page ("God so ordereth all things that orthodoxy leads to wealth," etc.). It is immortal, come what may to the book that contains it.—"Contemporary Review," April 1868.

ORIENTAL Telegram Agency.

(Opposite the Bolsa)

Names and Addresses, if registered through these Agencies, are counted and charged as ONE word only. No charge is made for this registration.

The charge for the first word also covers cost of transmission by Telegraph of the place from which the Message is sent, date, and time of despatch.

A special feature of these agencies consists in telegraphing the number of words in each despatch.

It will greatly facilitate business if the registered number is placed upon Messages before being handed in for transmission.

Extracts from the Oriental Telegram Company's Rules.

Rule 3.—Implicit Secrecy is to be observed with regard to Messages, not only as to their contents, but not information is to be given as to whether any person or firm has or has not sent a message.

Rule 4.—Complaints of error, delay, or of any other nature, should be made by the person forwarding the message. The Receiving Agent cannot give any information on the subject, and should be very careful not to speculate upon the causes of delays, &c.

Rule 9.—Every message must be signed by the sender.

Rule 10.—All messages are to be prepaid to their destination.

Rule 34.—In the event of doubt arising as to the correctness of a message, the Cable Company may be prevailed upon to repeat it; but the Rules of the Cable Company must be regarded in this matter, and the message cannot be rectified at the expense of the Oriental Agency.

The system adopted exclusively by these Companies insures a degree of accuracy in the transmission of telegrams acknowledged by the chief Cable Companies never to have been attained by any other agency.

NOTICE IS HEREBY GIVEN, that Messrs Lamas and Co. are definitely installed by the Head Office, London, as Agents of the above Telegraphic Agency, in the River Plate.

Merchants, bankers and others are invited to register their names without delay. Registration gratis, after which the names and addresses of firms and their correspondents count as ONE word only.

The Registration Book is now opened, and we earnestly request those intending to register to come early, so that the lists may be ready for the first steamer.

POETS IN ALL AGES HAVE DEVOTED LAVISH PRAISE upon that which so justly constitutes the pride of womanhood, a shiny, silky, wavy and rich head of hair. Baldness in olden times was considered a great imperfection, and still greater now in modern times, when an unfailing, safe and agreeable means to avoid it is within the easy reach of all. Even in cases where the application of the Oriental Tonic is not exactly demanded by disease, it is prudent to adopt it as a hair dressing, since it cannot do any harm, and will, on the contrary, keep the scalp free from all blemish, and impart to the hair an enhanced appearance becoming to all. Gentlemen of taste adopt it as a hair dressing, and extend its use to the beard, because it imparts to it a rich gloss, giving an appearance of refinement and neatness not to be overlooked in the most refined. For sale by all dealers in perfumery and drug stores throughout the world.

STANDARD OFFICE,
Thursday, 10 a.m.

We have just had the pleasure of another communication from the War-Office; Colonel Romero has in the most courteous manner assured us that the Government has no wish to give us unnecessary trouble, and no longer obliges us to obtain previous approval from the War-Office, if we comply with the following terms:

1st. Present the first four copies printed each night, of the morning's paper.

2nd. Stop the press if the Minister of War send us such intimation.

3rd. Hold ourself responsible for every line in the paper.

We feel much obliged to the Minister of War for relaxing the regulations so far.

THE SITUATION

TWENTY-EIGHTH DAY.

The U.S. war-steamer Wasp, Captain Mahan, arrived in port yesterday from Montevideo, having touched at Colonia. General Mitre had left Colonia some days before, which confirms the impression that he has crossed over to the Province of Buenos Ayres. The American Admiral, Leroy, may be expected shortly in these waters, as he is to leave Rio Janeyro about the end of October for the River Plate.

Some boxes marked "Remington rifles for Col. Rocca" passed along Calle San Martin yesterday in furniture waggons. During the Sarmiento administration the use of Remingtons seems to have been largely adopted, although connoisseurs say the Martini-Henry is a better instrument.

The South American Red Cross Association inform us that they intend to obtain General Rivas's approval of their statutes. We still hope that the campaign may prove as bloodless as up to the present, and save any necessity for the Red Cross Society.

The *Nacional* announces that His Excellency Sor. Blest Gana, Chilian Plenipotentiary and Envoy Extraordinary, has demanded his passports on account of the nomination of Don Felix Frias as Minister of Foreign Affairs. It is added that Mr. Frias gave so much trouble in the negotiations about Patagonia that the Argentine Government consented not to allow him any further interference in the matter. The present appointment would precisely bring the Patagonian question into his special jurisdiction, and hence the cause of the rupture with the Chilian Minister. We had understood that it was agreed to leave the matter to arbitration. The present difficulty comes at a most unlucky time.

The *Nacional* mentions that the Ministas have destroyed several bridges on the new branch of the Southern Railway beyond Chascomus. Also that the *Boletin* of the revolution says General Mitre is now at the head of 30,000 men, having captured 4 pieces of cannon from Colonel Plaza Montero. It says there is no truth in the rumour that the Government is about throwing up strong trenches at Barracas to defend the city. The Pampa has been ordered to the Boca, and the 2nd commander of the Pavon is dismissed.

The editor of the Italian paper was yesterday summoned by the Police to receive a caution for some news. At present any editor who publishes what may appear unpleasant in type has only himself to blame.

Major Uzal writes to the *Nacional* it is quite false a soldier of his dropped dead yesterday at Plaza Concepcion, or that five were killed by lightning.

Col. Maldonado has been sent by Roca with cavalry in pursuit of Gen. Arredondo.

Col. Vidal 1st batt., Col. Moscoso of the Gen. Paz batt., Major Pizarro 3rd batt., Col. Patiño of Students' batt., and Col. Cuenca of the Rivadavia batt., forming the garrison of Cordoba, publish a protest in the *Eco* of Cordoba, to the effect that there were abundant means to keep out Arredondo, and that the city was surrendered to him without their knowledge.

The *Tribuna* says that General Mitre left Santa Lucia on Saturday, 18th instant, and proceeded by train to Montevideo, where he embarked with 60 artillery-men and half-a-battalion of Urbanos aboard the steamer "Montevideo," which left port along with another steamer on Sunday, steering in a southerly course as if to meet the gunboat Paraná, hourly expected from Rio Grande. The same paper adds that the Argentine Government is kept in constant information of the proceedings of the Mitristas at Montevideo, and the facilities afforded them for embarking arms and supplies.

According to the Government papers the army of Rivas is going southward from Las Flores, and has been reinforced by Machado and Ocampo; comprising about 2,000 men with a large troop of horses, and proceeding as if towards Tuyú and Ajó. Messrs. Elizalde, Cantilo and others are said to be of the number.

The Government forces under Colonel Luis Campos have crossed the Salado without being able to find Rivas. The southern division under Colonel Julio Campos, or as some of the papers say, Colonel Garmendia, has returned from Chascomus to Altamirano, and intercepted some letters from which the Government conclude that General Mitre has not yet landed. Lieutenant Bravo, who was made prisoner by General Rivas at Azul, has escaped to Buenos Ayres to offer his services to the Government: he belongs to the 1st of the Line.

Col. Rocca has telegraphed a complimentary letter from Rio Cuarto, Oct. 20th, to Col. Sarmiento on the occasion of his descending from the Presidential chair. He says Gen. Arredondo now means to carry the war into the Cuyo Provinces, Mendoza, San Luis and San Juan, but that he only picked up 400 men at San Luis on his march for La Paz and Mendoza. Rocca did not feel inclined to pursue him, until he has his infantry properly mounted. He does not estimate Arredondo's forces over 800 men, and hopes Governor Civit of Mendoza will be able to make a good stand against the assailants. Rocca says that the Province of San Juan is undecided as yet, although the San Juaninos are said to be sending mules for Arredondo's army, which Rocca cannot believe.

The War-office received a telegram from Col. Rocca, Wednesday morning, as follows—

"The war is becoming 'montonera,' and I am preparing accordingly. It will probably be the same in B. Ayres. If Governor Civit holds out in Mendoza it will be over soon. I am hastening after Arredondo. Since Dr Alsina has become War Minister you may be sure Rivas will not approach B. Ayres, but knock about the frontier forts."

Major Carlos Paz telegraphs same day as follows—

"You know all about my movements. This army is in a brilliant condition. Arredondo left Mercedes for San Luis and Mendoza, trying to form an army; but his efforts will be vain. My brigade consists of the Rosario battalion and 2nd Cordobese batt. Respects to Barros."

The 6th Reg. of Nat. Guards, quartered in Plaza Concepcion, have subscribed to have a band of music play every afternoon from 4 to 6 in the said plaza, for the recreation of the neighbors.

Don Manuel Zorrilla, editor of the *Union*, retires from editorial life to act as private secretary to President Avellaneda.

The Provincial Government publishes a despatch from the Judge of Chacabuco, Oct. 18th, to the following effect.

"I arrived here on the 16th and found the place in great alarm as 3 neighbors had been murdered.

"Next day a group of 11 or 13 armed men with handkerchiefs on their faces were murdering and plundering near the Salado. I set out with 120 men following the track of the criminals, but night came on, and we had to return, after a fruitless ride of 16 hours.

"Up to the present I know of nine persons murdered, one wounded, several women badly injured, and the houses sacked."

Unfortunately similar news reaches us from other quarters, and the state of the camp districts is truly awful.

LATEST FROM EUROPE.

PARIS, 13th Oct.—Great piano factory of Herz destroyed by fire. Result of elections: Republicans won in 29, MacMahon's party 19, and Bonapartists in 8 departments. Marquis of Noailles published circular defending MacMahon's septennate; the rumor of his resigning his Embassy is contradicted by the *Moniteur*. Several foreign officers assist at the Autumn Manœuvres ordered by MacMahon. Several Republican deputies have gone over to Government.

BERLIN, 13th.—It is rumored the Emperor William intends to return to Gastein. The Archbishop of Posen refuses to resign his see, and declares he prefers to suffer imprisonment like the other prelates.

MADRID, 13th.—No news yet of the impending battle. Carlists are concentrating at Puente La Reyna, and Government troops at Oteiza. A body of Carlists under Lozano suffered a reverse near Traxillo. The editor of the *Igualdad* in Madrid was put in prison for publishing war news. The Government is doing its best to send more troops. The papers complain of fresh supplies sent to the Carlists from France by the Hendaye frontier.

LONDON, 17th.—Much anxiety to know any reliable news about revolution in B. Ayres.

H. M. S. AMETHYST.

This magnificent corvette, the fastest vessel in the southern hemisphere, was built last year at Plymouth, and made her debut at the Gold Cost in the recent Ashantee-war, being actively employed in blockading the coast. She sent 70 men to the Naval Brigade under Captain Blake, who was killed, being succeeded by Capt. Grubb. Her armament consists of 14 powerful guns, nominal horse-power 350, working up to 2200 h.p. She goes 14 miles an hour and carries 250 men and the following officers:—

Capt. Chadfield, Lieutenants Bickford, Roberts, and Reeve, Chaplain Rev. R. Reill M. A. Cantab., Staff-surgeon 2nd class Humphreys M.D., Paymaster Row, Chief Engineer Watson, Surgeon Cox M.D.T.C.D., Sub-lieutenant Ryan, Navigating Sub-lieutenant Davenport, Assistant Paymaster Nash, Engineers Sharp and James.

Capt. Chadfield has been over 20 years in the navy, and gained 3 medals for gallant services. He was Commander under Admiral Jones aboard the flag-ship Shannon, and afterwards commanded the Nimble, then remaining for some time as Post Captain on half-pay till put in command of the Amethyst on the outbreak of the Ashantee War, at the conclusion of which he received the thanks of the Commodore for his services on the Gold Coast.

Lieutenant Bickford has served in various parts of the world, especially aboard the Barossa and Earyalas, in China.

Lieutenant Roberts can point to many years of service. He was in the fine line-of-battle ship Conqueror, 101 guns, when she was lost at Rum Key in the West Indies, and afterwards served in the Royalist and Favorite also in the West Indies. He was on board the Volage in Ad. Beauchamp Seymour's Flying Squadron.

Lieut. Reeve served in the flag-ship at Gibraltar and in the Mediterranean, aboard the Zebra in China, the flag-ship Rodney also in China, the flag-ship Narcissus of Ad. Seymour's Flying squadron; and lastly aboard the Simo omin the Ashantee war.

Paymaster Row was Secretary to Commodore Dowall on the West Coast, and served in the Admiral's office in the Mediterranean under Lord Clarence Paget.

The Emperor of Brazil gave an audience at San Cristoval to Captain Chadfield, Lieutenant Reeve, and Paymaster Row, and enquired at some length about the services of the Amethyst on the Gold Coast.

We learn that the Amethyst carries some of the formidable Harvey torpedoes. It is possible that she may be ordered round to the West Coast, as soon as the present troubles in Buenos Ayres terminate. The officers will hardly have a chance of forming a pleasant impression of our city under present circumstances, for we believe no English naval officers are now allowed to remain ashore except a few hours in the day. Meantime we salute Captain Chadfield and his gallant subalterns, hoping the war may be over sooner than at present appears probable, that they may see the Athens of South America to better advantage, in its normal condition of peace, progress and hospitality.

TRAVELLING IN BOLIVIA.

Sucre, Aug. 28th.

Messrs Mulhall Brothers.

Dear Sirs,

I have recently recovered from a severe attack of tertian fever—which, by the way, if you never have experienced it, I can tell you, is similar in feeling to an hour's freezing, or being packed in ice, then an hour or more of hot baking, and finally an hour's stewing; after which one is comparatively well for the next forty-eight hours, when the same sensations reoccur. One shivers and shakes until his teeth rattle like a pair of castanets or bones in Christy's minstrels.

After using some of the principal remedies in practice with no permanent effect upon my system, I determined to try the virtues of similia similibus,' by resorting to the more elevated and cold regions, with the idea to freeze the tertiana.

After three weeks' absence, and travelling some forty leagues beyond Potosi, in the Puno or heights of the district of Porco, I returned here apparently cured, and have experienced no subsequent chills or fevers.

My companion was the talented Government engineer, J. B. Minchin, of Erin's Green Isle, who was employed surveying the route for a carriage road between here and Huanchaca, via Potosi; as quiet and clever a fellow as ever straddled a mule or handled a theodolyte.

About noon of the day of our departure we stopped at Yotala, and breakfasted with His Excellency Don Tomas Frias, the President of the Republic, who is building a summer residence near the afore-mentioned village. His Excellency is a plain republican, of finished education, and moves about Sucre and its environs unattended by an escort.

'En passant' in his customary after-dinner walk in the capital he is usually accompanied by two or three aides-de-camp. A few weeks ago, when His Excellency and aides were passing through the Prado, or public park, where bull-baiting or teasing is sometimes permitted, a tormented bull made a charge at the Presidential party. The youthful and agile aides made themselves scarce, seeking shelter behind the hedges and walls, leaving His Excellency alone to meet the enraged bull, which he did with coolness and self-possession, threatening the worried brute with his voice and walking-stick, until some Cholos came and lassoed the beast, and permitted him to resume his walk. A plucky feat for a veteran of eighty years or thereabouts.

After an excellent breakfast and a cup of coffee, we made our parting salutations, and continued to La Calera, the first post-house, stopping a short time at the palatial residence of Don Gregorio Pacheco, one of the most enterprising and intelligent gentlemen of this country.

He has the good taste to reside with his family at his 'hacienda' throughout the year, and is making his place, Nucchu, that was formerly a barren waste, to be a fertile and flourishing quinta. You can hardly form an idea of the labor, expense and trouble one has to have a quinta in these rocky 'quebrados.'

The post-houses of this country offer no accommodation beyond an unfurnished room and corral, and food for one's self and animals—the national dish, Chupi (a potatoe and 'aji' soup), and sometimes an 'asado,' can generally be procured.

One has to carry his bedding and extras, such as tea, coffee, chocolate, sugar, bread, etc.

Through the kindness of our mutual friend Musters, who loaned me a Crimean cot, which, with my pillow, 'sobrepuesto,' 'corona,' 'sudador, blanket and 'poncho,' made a comfortable bed with sufficient covering.

The ordinary bedstead, or sleeping place, is a mass of hard-packed 'adobes' 8 feet long by 4 feet wide and 2½ feet high, upon which one can spread his sleeping gear.

During the warm weather the post-houses are said to be infested with fleas and 'binchucas,' the last a horribly nasty-looking, repugnant, blood-sucker. Now the weather is too cold for them to appear.

The following morning, after chocolate and bread, we mounted, and an hour's ride brought us to the Pilcomayo river, about 350 yards wide, the bed of which we crossed at an elevation of about 8000 feet above the level of the sea. At present there is, say 2½ feet water in the principal channel, which is not more than sixty yards across.

A bridge just above where we crossed affords a passage during the rains and high river. On the opposite side, about a league down river, the road crosses a high and rough 'cuesta' that took us a good two hours to ascend. From its summit (10,000 feet) to Pampatambo post-house is but 20 minutes' ride. Here we breakfasted, after which we resumed our trip, and in the evening reached Quebrado Hondo post, where we dined and passed the night. We had the pleasure to meet here an acquaintance, Don Andres Aramayo, on his return to Sucre from his mines in Colquechaca. He kindly gave us a letter of introduction to his brother in Potosi. We passed a cheerful and pleasant evening.

After 'tea and toast' the subsequent morning we parted with our gentlemanly friend, Aramayo, and resumed our road, passing Laguerilla's post house, near some lagunas, at an elevation of 12,000 feet. Here any quantity of ducks, geese, and other water-fowl were feeding, and I regretted that my fowling-piece was not at hand to furnish us with game for several days.

On ascending the cuesta which divides this locality from the Valley of Bartolo, we had a fine view of Choralque Peak, far distant to the South, near Portugalete. The Twins, or two hills of Sucre (Churuguella and Sicasica, as they are vulgarly called), the Macho and Hembra, are also visible to the North.

Descending to the valley, we passed the place where the Indians during the revolution of Tupac Amaru, made a determined stand and desperate resistance, but experienced a complete route and great loss of life: in fact, it is said to be the death-blow to that rising. Reached Bartolo, an 'adobe' village of some size, by 11 a.m., and breakfasted and had two of our mules shod, some shoes having been cast and some nearly worn out. These roads are frightful for the feet of the animals, as the result proved, for we had not journeyed two leagues beyond Bartolo when I discovered that the near-hand shoe of my mule had broke, and that only one-half remained attached to the hoof. I kept on at a walk until we reached Negrotambo post-house, where we stopped for the night.

My companion had turned down a 'quebrado' leading to the Mataca river, to examine if he could find a practicable and easy roadway to avoid a 'cuesta.' He did not reach the post house until after dark, when we dined, and were soon after under the blankets. The nights are long, and growing sensibly colder—Fah. Ther. 22°. The following morning, when after our usual biscuit and chocolate, we mounted, and half an hour's ride brought us to the 'Baños Termales,' some natural hot springs issuing from the ground. Quite an establishment is built above and around them, and they are said to be a specific against rheumatism, scrofula, skin diseases, etc.; 'quien sabe;' we did not try them. Another half hour's ride brought us to the 'pueblocito' of Samasa, a small, clean looking village, where the post was formerly.

Another hour's ride brought us in view of the Cerro Rico de Potosi, that emerged its conical from behind the high and jagged range that has hitherto concealed it from our sight. Even at this distance, three leagues, one can clearly see the mouths of many mines that enter into its sides.

The road since our departure this morning is comparatively level, has a gradually ascending grade, which continues within a league of Potosi, when it winds round some hills, and after passing a few small 'quebrados' we enter the Imperial City (as it was formerly termed,) from the north, on an elevation of about 13,500, barometer shewing 18 in. 95. Took up our quarters at the Tambo Arteche, where I propose to rest, and relieve both you and myself for the present.

Yours truly,
Traveller.

EDITOR'S TABLE.

There wasn't even a fresh 'bola' yesterday about the Situation. The 'gobemouches' seem completely pumped out, and their inventive powers exhausted. "As you were!" represents the state or things in the Camp. There is a deal of wool ready to come in, if 'picadores' to drive the bullock carts can be found.

A subscriber of ours begged of us yesterday to testify to the fact that there are such things as Atmospheric Railways, having had a warm debate with some friends who laughed at the idea, considering it an impossibility. We can personally testify to having travelled many a time and oft in our schoolboy days between Dalkey and Kingstown on a railway of this description, and very pleasant and terrifically fast travelling it was. The first attempt to use atmospheric pressure as an agent for transportation was made in 1810 by a Danish engineer named Medhurst, and in 1832 he sent mails through a pipe by it. The London Post Office now uses Pneumatic Tubes to send mails to various parts of the metropolis. Up to 1847 70 patents for Atmospheric Railways were applied for, but they all amounted to little. Four atmospheric railways were at work about 30 years ago, but they gave poor results—one from Dalkey to Kingstown, near Dublin, 2 miles long; one from Plymouth to Exeter, 22 miles; one from London to Croydon 10 miles, and one from Nanterre to St. Germain, in France, 2½ miles. A stationary engine is placed at one end of the line a tube between the rails, and by means of a piston attached to the train it is literally pumped to its destination. Atmospheric railways have been generally abandoned, as they don't pay.

Another interesting letter from our correspondent 'Traveller,' at Sucre in Bolivia, will be found in another column.

We saw yesterday a private telegram from London, dated 17th inst. which is not bad time, considering all the impediments.

Letters for Europe by the steamer Ariadne can be posted at the Capitania to-day up to 2 o'clock.

As a measure of precaution the authorities are about to establish an Hospital in Dr. Leslie's quinta.

A colleague publishes some interesting figures respecting the progress of catholicity in the United States. In 1825 there was one priest in Massachusetts, one in New Hampshire, one in Maine, and only eight churches in all New England. Now there are six Bishops, 441 priests, 432 churches and a million of catholics in said states. In all the other states of the Union a proportionate progress is recorded.

An industrious Italian residing at Dolores, B, O. blew his brains out last week because he had received a letter from Italy announcing the death of his mother.

The latest telegrams from Europe announce that the great battle expected in Spain was still in the womb of Time.

Mr. Goodby, the oldest book and newspaper agent in town, has just received from his brother in Manchester a handsome edition of the British Encyclopedia 21 volumes, published at 30 guineas, also Hume and Smollett's History of England with 200 fine engravings, published at £73. Both these splendid works, and some others, will be given in lottery prizes among subscribers to newspapers of Mr. Goodby's agency. Some rare books are often to be found at 103, Potosi. Last week we saw there De Angelis's great work on the River Plate, Nuñez history of the English invasion, &c.

The *Scientific American* states that Lake Titicaca, on the crest of the Andes, is the highest large body of fresh water, and that the lake never freezes over. Two little steamers of 100 tons each do a trifling business. Steam is generated by llama dung, the only fuel of the country, for there are no trees within 150 miles. The steamers actually cost their weight in silver, for their transportation (in pieces) from the coast cost as much as the original price. A steamboat company has asked from Bolivia the exclusive right of navigating Titicaca and the Rio Desaguadero to Lago Pampa, with guarantee of 6 per cent. on the capital and a share in all new mines discovered. Professor Orton, the latest traveller in the region, calls attention to the fact that Lake Titicaca is not so high as usually given in geographical works by about 300ft. Its true altitude is 12,493ft., and in the dry season it is 4ft., less. This fact has been revealed by the consecutive levellings made in building the Arequipa railway just finished, which reaches from the Pacific to Lake Titicaca. Lake Titicaca is about the size of Ontario, shallow on the west and north, deep towards the east and South. On an island within it are the imposing ruins of the Temple of the Sun, and all around it are monuments which attest the skill and magnificence of the Incas. There are also the remains of burial towers and palaces which antedate the crusades, and are, therefore, pre-Incarial.

Mr. Wilson, H. M. Vice-Consul at Colonia, has written to H.M. Plenipotentiary here stating that General Mitre did not stay at his house while in Colonia. His letter will be found in another column.

We had the pleasure of receiving Cordoba papers yesterday for the first time since the 24th ult. There is a prodigious bow-wow going on about the recent surrender of the city to General Arredondo without firing a pop-gun, and there is talk of a court martial, but who it is to try is not stated.

Brazil is still determined to keep up her reputation for long-lived inhabitants, as will be seen by the following extracts from the *Anglo-Brazilian Times*:—"Near Assu, Rio Grande do Sul, exist a couple, of whom the husband is 95. In 75 years of marriage they have had 17 children, and can now count up 482 living descendants At Santa Barbara, S. Paulo, a man named Victor died recently at the age of 130. A native of Ceritiba, Parana, named Clemencia Maria, died August 20th at the age of 110 years; she leaves two sons, 22 grandchildren, 27 second, and 1 third grand-children." Methusalem and all the other old buffers of that period had better look to their laurels. or Brazil will take the bloom off them. There is an immense amount of rubbish ventilated about the said old gentlemen, and we doubt, after all. if any of them lived a very much longer time than Mr. Victor of San Paulo. That well and favourably known party, Confucius, who flourished 550 B C, died at 72, and was considered a verh old man. The patriarchs had certainly one great advantage in the Race of Life; doctors and patent medicines were unknown then. Cockle's Pills are nothing to good Beer for prolonging life, as the following story proves—"A short time since Mr. H. Woolley, whilst on a sanitary survey of the parish of Cowbit, Lincolnshire, found two old men in one house, living with their children, one 85, the other 95 years of age. The latter has been in the habit of drinking one gallon of beer before breakfast, another during the day, and a few extra pints at night to top up with. He has never had an hour's illness. Verily we may hope that man's days may be prolonged on the earth.

A stormy petrel. A colleague announces the arrival at Montevideo of an agent of the great rifle-making firm of Remington and Sons.

Mr. Ximenez, ex-editor of the *Correo Español*, is about to start a new paper called the *Imparcial* at Montevideo.

The Rosario papers busily discuss the surrender of Cordoba, and the authorities of the learned city get some rather hard rubs for electing 'to fight another day.' There is nothing of any interest from Rosario. Like Buenos Ayres, the place is given over to the military. The *Capital* now charges half a real for its bulletins, being obliged to issue them constantly to satisfy the public avidity for news. 'Personero' brokers are the newest 'gremio' in Rosario; commission 40 per cent! The Santa Fe National Guards in Buenos Ayres write home to their friends that they like Buenos Ayres very much and are well treated.

The *Progreso* of Cordoba of the 16th announces the arrival there on the previous night of 100 sacks of mails from Buenos Ayres and Rosario. It also states that for 15 days none of the Public Offices or Law Courts have been opened. Things seem to be slightly awry in the City of the Doctors just at present.

Mails from the sister city were delivered yesterday morning. The second meeting to name a new Syndicate for the Bolsa met with no better success than the first. There was no one present to vote, and another attempt is to be made on the 28th, in all probability with the same result. The meeting of capitalists with the Finance Minister, to see how the 'wind' can be raised, has also ended in a most destructive fiasco. The only business done was naming a Commission, which was hardly nominated till every man Jack on it resigned, and capitalists, merchants and bankers all joined in a unanimous chorus refusing to lend a brass farthing to the Government on any terms whatever. H. E. the Finance Minister, being therefore on what may be styled 'his beam ends,' is about to ask Government to issue 4 millions of notes; he says he objects to such an emission on principle, but that "es preciso vivir," and that principles are not exactly the kind of diet to make a man fat, or nearly as substantial as beefsteaks and mutton chops for the purchase of which bank notes or gold is indispensably necessary. We greatly fear that the 'mauvais quart d'heure' to which M. Rubelais so feelingly refers is at hand in Montevideo.

Mr. Human, C.E., the constructor of the Salto and Santa Rosa Railway, has been presented with a splendid gold medal by the townsfolk of the former place. It weighs three ounces, and is made of native gold from the Tacuarembo mines; with a beautiful pendant, of the English and Oriental flags, a Sun and laurel crown. The inscription is—

To C. Human.
The people of Salto.

And on the reverse is a locomotive and the date of the inauguration of the Railway—

22*nd June*, 1874.

Mrs. Candido Bustamante sent several precious stones to adorn the medal, the cost of which was considerable.

A colleague makes the following singular calculation about William Astor, the great North American millionaire, now 90 years of age. It says that if he were to pass all the rest of his life handing out 11 patacon pieces to the poor, he would not encroach on his capital, which is calculated at over sixty millions of hard dollars. He owns 700 houses, many of them palaces, which, if placed in a row, would make a street four miles long. The origin of this colossal fortune was the purchase of land lots by his father at 200 dollars the acre, their present value being *half a million* the acre!. Hear that, ye land men and auctioneers! Now, Rematadores, don't forget a passing reference to old Astor (his prudence, foresight, glimpse at the mighty land secrets of the future, etc. etc.) in your next advertisements, which we hope to receive when 'Grim-visaged War smooths his wrinkled front.'

A mad dog created a terrific sensation in an apothecary's shop in Calle Uruguay (M.V.) on Sunday last. He danced about among the coloured bottles in emulation of the bull in the china shop, and retained his dental powers in full vigour to the last, having torn the pantaloons off the shop boy half a minute before two revolver bullets laid him low.

"La Grande Duchesse" will be performed this evening at the Varietes Theatre. The Alcazar is also open. 'Vive la bagatelle!'

A skeleton has been found in Italy that is said to be one hundred thousand years old. It is the skeleton of a man, and there is no one living in Italy now who remembers anything about the original owner.

GENERAL MITRE AT COLONIA.

British Vice-Consulate, Colonia,
Oct. 12, 1874.

The Hon. Lionel S. Sackville West,
H.B.M.'s Envoy Extraordinary
and Minister Plenipotentiary,
&c. &c., Buenos Ayres.

Sir,

My attention has been called to a transcription made by the B. Ayres STANDARD of the 6th inst., and which is as follows:

"It is still doubtful whether Gen. Mitre has any connexion with the revolution, as he is residing with the English Vice-Consul at Colonia."

As these remarks may create erroneous impressions, I consider it my duty to place your Excellency in possession of the following information.

I am not personally acquainted with General Mitre, I have had no intercourse with him either before or since his arrival here, nor have I had any communication with him of any nature, either directly or indirectly.

I am possessed of house property in this town, and my office is situated in the front room of this property; the rest of the house being rented to Don Miguel N. Cornell, an Argentine, and I understand that General Mitre was his guest for some days after his arrival here.

I have the honor to be,
Sir,
Your most obedient,
Humble Servant,
W. J. Wilson,
H.B.M.'s Vice-Consul.

Mr. James Lowry was warmly welcomed on 'Change to-day on his return from Paraguay, Mr. Lowry leaves to-night for Montevideo: he looks much improved by the trip and as fresh after his Paraguayan excursion as if he had spent 2 years in Ireland.

Mr. E. Casey has at his office in 118 Calle San Martin some fine samples of new wool, which buyers are invited to inspect; the wools of which they are the sample are expected in market next week.

For 60 days, 9 o/o.
For 90 days, 10 o/o.

The Cotopaxi from Europe is expected in Montevideo to-morrow, she will bring fresh dates.

Mr. D. A. Meier, of the leading London banking firm Messrs. C. G. Meier and Co. London, who has been on a short visit to the Plate took leave of his friends on 'Change to-day; Mr. Meier had intended to cross the andes, but was stopped at the Tigre for want of a passport; he leaves to-night for Montevideo to catch Cotopaxi for Valparaiso and from thence goes to Japan and China, and thus make his trip round the world.

Messrs. Bergerout and Co.'s workshop 966 Rivadavia, was entered to-day by order of some judge and property to the value of $100,000 m/c, seized to satisfy a claim of 700 m/c. At least this was the version given of the matter, but the Juez de Paz it seems denies having given any order for seizure.

The Ariadne, Captain Jones, sails to-morrow with full cargo for Antwerp; she takes a mail.

To-day there was much of a stir in political circles. In the city we had three regiments marching through the streets headed by the new chief of police Capt. Moreno. Several parties from the camp arrived in with news, more or less important; Rivas has fallen back from Las Flores and is marching in the direction of the coast. The Government troops that were at Chascomus have been brought back to the point of junction of the two lines at Altamirano, which is now the head quarters of the army of the South: a strong force being left in position in Chascomus.

To-day at 1 o'clock Mr. Thos. Armstrong, Pres. of the St. Patrick's Society, accompanied by Mr. E. Casey Hon. Sec. waited upon Governor Barros, for the purpose of obtaining from Government an exemption from military service of the picadores or drivers of bullock carts. This measure is most necessary, as there are numerous troops of bullock carts all laden with wool, hides and tallow, that can not start for town owing to the peones refusing to come in unless they receive the same exemption as troperos with cattle for the market; Mr. Casey who arrived in from the camp last night, says, that if the Government grants this exemption to the bullock cart peones, we may look forward to plenty of produce from the South and West next week.

Messrs. Balbin & Plowes, the great city auctioneers, held a very important produce auction this morning at Messrs. Peters & Hall's barraca; the following were the prices obtained:—

1950 cow hides, saved from lighter Maria, at 167 m/c. per pesada.
750 do do at 169 m/c.
1168 becerros sin averia, 179.
326 doz. sheepskins, matadero, 21⅝ rls. per lb.
135 doz. do 23¼ rls. do.

To-day several parties who had come in from the suburbs on the breaking out of the revolution returned to their country residences at the Lomas and other parts.

Respecting the amortization required by the National Bank on the renewal of bills a director of the bank calls our attention to the fact that these bills when discounted it was on the express understanding of payment in full at maturity; parties therefore have no reason to complain if the bank demands 15 per cent. for a renewal for 30 days, since the terms of the discount were payment in full, the same as in England, where bills falling due must always be paid in full.

The Olbers mails came up to-day from Montevideo and were delivered by the Post-office at 2 o'clock.

Mr. Furze of the Montevidean telegraph office remained down at Punta Lara all day, testing; the break, we regret to say, is in the cable, which has been cut maliciously, apparently by a blacksmith and with a chisel; so much for telegraph cables in the Plate.

We had a visit to-day from Mr. Benitez, the rich Californian, who comes with a large capital to settle in the Plate; he purposes making a trip to the Californian colony in the Gran Chaco, and having a good look round before settling down.

The mooted feria is the great topic on 'Change, everyone looked forward to the Government decree this morning from what the *Nacional* of last night said, yet the decree has not been made, nor will it be made, as we are given to understand, Government being of opinion that credi ors and debtors should be left to themselves to make their own arrangements; the stringency in the market could hardly be greater.

Shearing is going on most actively outside. In Luxan and Canuelas the National Guards are allowed on leave of 8 days to go to the estancias and shear. On many of the principal estancias there is no scarcity whatever of hands, this is rather good news for exporters.

The papers from Montevideo report that on Monday, a band of robbers broke into the Buschental Mill, and carried off not only the money some 2000 pats. but also the iron safe of the establishment; stiff this.

To-day 250 bales of wool saved from the British barque Morning Star, bound from Buenos Ayres to Antwerp were sold by auction in Montevideo for account of underwriters.

Consignees of goods per Sheffield are anxious to know what has become of the goods; the vessel is under general average and most of the goods damaged, but why is not the business wound up.

Yesterday the cargo of Amer. barque Asphodel, from Boston to Valparaiso, was sold at Montevideo, for account of underwriters; 4000 cases kerosene, 1000 do lard, 4000 do. turpentine, 450 do. chairs etc.; prices as yet not stated.

The steamer from Montevideo to-day brought up news of the arrival yesterday of the Hamburg steamer Karnack, sailed to-day for Valparaiso. Exchange in Montevideo looks rising; bills passed yesterday, on London at 51¼ and on France 5.37.

The sale of a cargo of Chilian flour in Montevideo yesterday at 9 pats on board is reported and in produce nothing done.

The steamer Rosario has undergone thorough repairs and is now placed on the Montevidean route.

Advices from the Uruguay report the Salto and Santa Rosa Railway now finished as far as Arapey, to which place it will be opened to the public in a few days; this shows progress.

At the Western Railway station Once de Setiembre, we were glad to see this morning several waggons loading pine and other articles for the camp. The plaza is perfectly bare, not even a cart with maize or potatoes to be seen; at the barracas not a particle doing and from the general attitude of things outside it seems probable that very little wool will be in before the end of November.

In our last exchanges from England we find the following financial items:—

"There is nothing new to report in wool. Prices are firm, and the demand seems good.

"The Douro, from Brazil and the River Plate, has arrived at Southampton with £111,766.

"Warrants for payment of the dividend of 28s. per share, declared by the Central Argentine Railway Company in July last on their share capital of £1,300,000, have been sent out.

"The Brazilians in London celebrated Independence Day with much spirit, and while doing so toasted their friends on the other side of the water.

"To the disgust of the 'bears' Uruguay bonds have lately risen in price, due, we hope, to the soundness of the security. There should be a great future before Uruguay, which would be much marred by repudiation or default in meeting its monetary engagements. We (Herapath's) cannot believe that Uruguay will either repudiate or make default, especially in respect to the foreign part of the debt.

"Reuter's Telegram Co. (Limited) announce a reduction of their rates for private telegrams to Montevideo and the Australian colonies."

Herapath's Railway Journal gives the following respecting the Central Uruguay Railway:—

"Central Uruguay Railway.—It is announced in the report just issued that the section from Montevideo to Santa Lucia, not quite 40 miles long, has produced a traffic in the year 1873 of £61,580, averaging £30 2s. 10d. per mile per week: yet this is derived principally from passengers, namely, £45,971 of it, and from the whole line Montevideo to Durazno, a great goods traffic is expected. The working expenses, however, for the year have been from exceptional causes heavy, namely 71 per cent. The profits from the £61,580 traffic have been only £17,757, yet this forms a substantial percentage on the £300,000 bonds issued in this country for the completion of this section, bonds which are a first charge on that, line. The profits last year were nearly 6 per cent. on the bond capital. It is pretty clear, then, that when the working expenses fall to their natural level, and when the goods traffic from the Durazno extension comes on the line, that the bond interest will be much more than covered, leaving a surplus for the preference shares of the Durazno section, the preference shares being a first charge on the Durazno section and a second charge on the St. Lucia section. Both sections are guaranteed by the Government of the country, and the amount due under the guarantee upon December last has been paid.

"So far this pioneer railway of Uruguay has done well, and there is every reason to believe that it will do better now that it is completely opened to Durazno, an event which took place on the 11th July, 1874, a week or two back. We shall soon begin to see what the line will accomplish. We shall rejoice if it is speedily placed beyond the reach of the Uruguayan 'bears' by such a traffic coming on it as shall raise it above the Government guarantee. We perceive that the general manager speaks of "the certain large increase in goods traffic on the opening of the line through", and even hopes that it will "favourably compare with those (receipts and expenses) of other River Plate railways". If this line pays well it will be a more potent means of providing Uruguay with a railway system than even the guarantee of the Government. The railways on the other side of the Plate are prosperous undertakings, and the traffic results of the first bit of line opened in Uruguay certainly indicate similar results.

"One thing is clumsy and unpopular in connection with this Company, and probably accounts in some measure for the low price of the preference shares on the London market. We allude to the legal constitution of the Company, which is not like the Buenos Ayres Great Southern and other Argentine railways, i. e., an English Limited Liability Company, it is formed under some law of the Uruguayan country with which we in England are not familiar. We believe it practically confers limited liability, although the shares are registered under deed in London. But it would be more satisfactory to the Preference Shareholders to know definitely what their legal status is, by bringing the Company under the English Limited Liability Act, and we are extremely glad to find that the discussion upon this important point at the previous meeting is bearing fruit—and that something like a step is being taken for the conversion of the Company into a limited liability one. If the Montevidean Government are alive to their own interests they ought to give every facility to place the Company on the best footing."

The Entre Riano Bank question is the topic of the market, the general impression was that the Bank held large funds in this city, but from the statement at foot it will be seen that so far from holding funds in the hands of Messrs. Llavallol that firm is a creditor of the Bank to the extent of 35,000 pats; so late as 17th inst this firm accepted a draft for 6000 pats at 3 days sight. No drafts of the Bank have been protested in this market; as will be seen by the balance sheet the concern is a very small one, the total circulation being only a little over half a million of pats.

SAVINGS BANK
BANK MAUA AND CO
101--Calle Cangallo--103
BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the great emporiums of the River Plate, Montevideo, and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Maua & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depository for their savings.

The sums deposited in that very important institution are daily increasing, and already reach very lrge amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need sickness, or old age, instead of spending them in immoral gambling, in lotteries, and other ivolities.

The Bank of Maua & Co. of this city, following no de example of their firm in Montevideo, the same facilities in this city, and has opened a Savings Bank at No 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.

The Bank will deliver to each depositors a pass book, in which will be entered the amount deposited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interes will be calculated up to date.

The Bank of Maua & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Maua & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1862.
